

Australia Automobile Incidents Reporting and Alerts (AAIRA)

Australia Automobile Incidents Reporting and Alerts (AAIRA) is a one stop, cloud based crime information center. AAIRA facilitates the gathering and reporting of criminal related incidents from petrol stations, car parks, hotels and other retail businesses.

Benefits

- Easy public sharing of criminal related incidents and information
- Integrated electronic surveillance net at smart outlets allows real-time and instantaneous detection and highlighting of vehicles of interest
- Ready tools to search and analyze vehicle profiles and incident history
- Seamless integration with **Smartveillance**® products means synergy of related data with subscribing outlets
- System enables fast and comprehensive monitoring and sharing of real-time criminal activities among retailing communities.

Main Features

- Cloud based system that highlights, classifies and flags the latest incidents and detected vehicles of interest
- Simple and intuitive interface to enable manual and automatic capture of incidents with image and video uploading.
- Electronic Surveillance Net to quickly share any vehicles of interest detected at **Smartveillance**® equipped outlets
- Complete and easily searchable incident listings (latest and historical) as well as car profiles.
- Smart Alerts that can be triggered on the web page and/or sent to the subscriber's email

Case Study of SV-PLuS installed at petrol station outlets

The system will alert the operator with an alarm when a blacklisted vehicle arrives at the connected petrol station. For outlets that subscribe to AAIRA, SV-PLuS will facilitate the submission and receipt of offender information such as license plate number and vehicle image anytime an offence is committed. Users can also email reports to law enforcement from AAIRA.

SV-PLuS
